GASKETED ACCESS DOOR

PRODUCT DESCRIPTION

The GD Series gasketed access door is fabricated from 18-gauge galvanized steel with a white prime coat finish. The door and frame are fully gasketed to form a tight seal and reduce air infiltration, with gaskets on three sides of the door stop and between the door and frame. The door has rounded safety corners, a concealed pivoting rod hinge, and a screwdriver-operated latch. The frame has a 1-inch-wide flange for concealing the rough wall opening and includes 1/4-inch mounting holes for fastening within furred spaces.

FEATURES

- Door and frame are fabricated from 18-gauge galvanized steel.
- Fully gasketed construction reduces air infiltration.
- Oil-resistant, fire-retardant blended Buna-N foam gasket material is used.
- A concealed pivoting rod hinge prevents distortion and helps the door close squarely.
- The door has rounded safety corners.
- The standard latch is screwdriver operated.
- The frame includes 1/4-inch mounting holes for installation.

APPLICATION

Used for new construction and remodeling access openings in masonry, tile, wood, and other wall and ceiling surfaces, including clean rooms, laboratories, and operating rooms.

MATERIAL

Frame: 18-gauge galvanized steel

Door: 18-gauge galvanized steel
