TA-HF

HIDDEN FLANGE ACCESS DOOR

PRODUCT DESCRIPTION

The TA-HF Series Hidden Flange Access Door is fabricated with a 16-gauge galvanized steel door and frame finished with a prime coat suitable for field painting. The door uses concealed pantograph hinges mounted on the long side of the rectangular panel and a standard screwdriver-operated cam latch. Its concealed frame and beveled door edges create a low-profile appearance that blends into surrounding wall or ceiling surfaces while avoiding the need to mud or plaster a visible flange.

FEATURES

- Door and frame are fabricated from 16-gauge galvanized steel.
- Door and frame have a prime coat finish suitable for painting.
- Concealed pantograph hinges are mounted on the long side of the rectangular door panel.
- The standard latch is a screwdriver-operated cam latch.
- Hidden flange construction helps the access door blend into surrounding surfaces.
- Beveled door edges provide a less visible installed appearance.

APPLICATION

Used for new construction and remodeling access openings in masonry, tile, wood, and other wall and ceiling surfaces.

MATERIAL

Frame: 16-gauge galvanized steel

Door: 16-gauge galvanized steel
